This guide is intended for quick consultation only and does not replace the user manual. Before using or maintaining the machine, read the user manual carefully and strictly follow all the instructions.

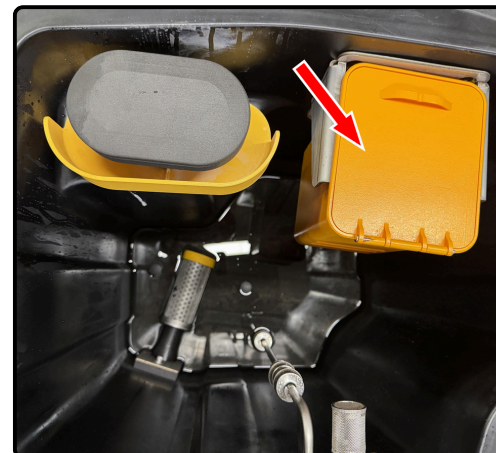

Daily Maintenance

Drain the recovery tank.

Open the recovery tank lid

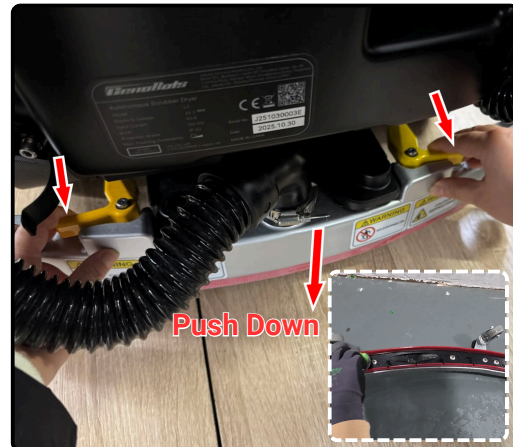

Take off the debris bag, empty and clean it.

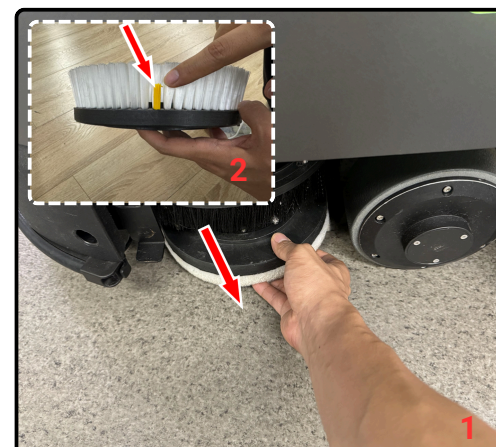

Rinse the recovery tank.

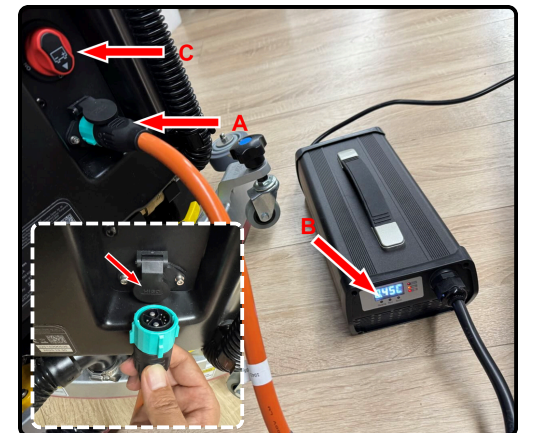

Remove the vacuum motor filter and clean it. **(Wring out the water before installing.)**

Remove the squeegee, clean and check the blade for wear.

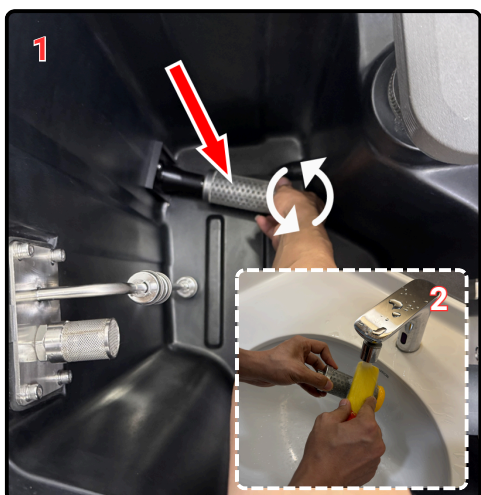

Remove the disk brush/pad(1) and check the wear(2).

Charge the battery.

*Turn the red switch (C) to 'OFF' position when charging.

Weekly Maintenance

Clean the Recovery Tank Filters

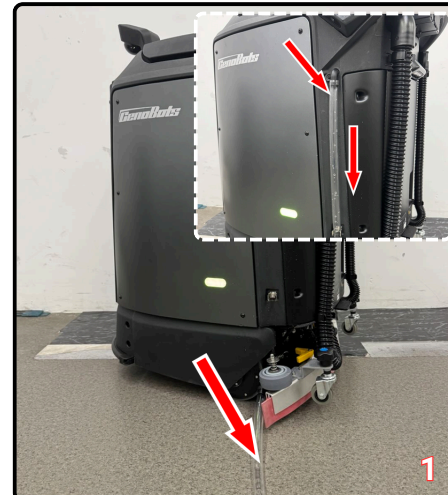

Remove the filter(1) from the recovery tank, and clean it (2).

Clean the Vacuum Hose

Switch to vacuum mode by pressing buttons 1 and 2. Submerge vacuum hose into a container with water.

Monthly Maintenance

Clean the Solution Tank Filter

STEP 1: Drain the solution tank.
STEP 2: Remove the right cover.
STEP 3: Remove the filter.
STEP 4: Rinse the filter.
